INFORMATION TECHNOLOGY.
GIRLS GET IT.

Smart girls have all the fun. And yet, only about 20% of information technology professionals are women, which makes no sense when you consider the vast majority of careers use technology every day. Life is all about CHOICES! Talk to your guidance counselor and plan your future by going to FACTS.org and figure out how you can make the most of your potential. Starting in middle school, you can choose an area of interest, and find out what courses you need to take to reach your goals. Focus on IT and you could be making \$50,000 a year as soon as you graduate! If you want it, come and get it at www.GirlsGetIT.org.
